TOTALS (all districts)		135,333	62,882	198,215	TOTALS (6 districts)	53,375	144,384

EXPLANATIONS

1. The above table shows distributed and committed emergency shelter distributions against households affected at district level.
2. Coverage figures assume that each household requires two plastic sheets each.
3. Data on slightly affected households has not been included.
4. The data is based only on information received so far from implementing agencies (on distributions) and the Government of Indonesia on population and affected households (by 13th October). **These figures are not definitive.**

REFERENCES

- a. Population data (numbers of households per district) - Gol, 2008
- b. Affected households data - Gol/BNPB, 13/10/09
- c. Coverage data - gathered at Shelter Cluster coordination meetings and reports submitted by implementing agencies in the last week.
