General Notes

1. FOR SETTLEMENT OR CAMP SETTINGS, PROVIDE SITE, 45 sq. m PER PERSON, INCLUDING 'SHELTER PLOT, ROADS, FOOTPATHS, EDUCATIONAL FACILITIES, SANITATION, FIREBREAKS, ADMINISTRATION, WATER STORAGE, DISTRIBUTION AREAS, MARKETS AND STORAGE, PLUS LIMITED HOUSEHOLD GARDENS' [AND PLAYSPACE]
2. SHELTER SITE TO BE DRY, ABOVE SURROUNDING GROUND BY A MINIMUM OF 0.3 M. AND LEVEL WITHIN 0.1 M.
3. SHELTER COVERED AREA 3.5 SQUARE METERS PER PERSON (SPHERE MIN. STANDARDS)
4. WRAP STRUCTURE WITH REINFORCED PLASTIC FABRIC
5. USE SIMPSON HURRICANE CLIPS AT ALL JOINTS.
6. METAL TIE STRAPS TO CONNECT FROM SILL PLATE TO TOP PLATE, AS SHOWN IN ELEVATION DRAWINGS.

Window and Door Panel Notes

1. Window panels are 3'-3 3/4" (1.0m) square, outside measure. Material is 2 x 2 SPF. Each corner is secured with a single 8d 3 1/2" nail and a (S/H 2.5) tie, using (4) 6d, 2" nails at each tie. Two steel strips (CS-14) are nailed from the top-center to the lower corners. The window panel is secured to the frame with two single 10d, 4" nails placed 4" down from the top of the frame on each side. The nails serve as a pivot hinge. A 3" slide bolt is installed at the bottom of the window. A 1/4" hole is drilled in the sill to accept the bolt.

2. The door panel is 3'-3 3/4" (1.0m) x 6' 7 1/2" (2.0m) outside measure. Material is 2 x 2 SPF. Each corner is secured with a single 8d 3 1/2" nail and a (S/H 2.5) tie, using (4) 6d, 2" nails at each tie. Two steel strips (CS-14) are nailed from the hinge-side center to the upper and lower corners. The door panel is secured to the frame with two single 10d, 4" nails placed 4" from the outside edge through the top and bottom rails. The nails serve as a pivot hinge. A 3" slide bolt is installed at the side of the door. A 1/4" hole is drilled in the jamb to accept the bolt.

Application of Tarpaulin to Frame

1. Lay tarpaulin on flat ground. Fold to required full height of wall.
2. Roll tarp around a 2 x 2, 9 feet long.
3. Apply tarp to wood frame with 3/4" staples, placed 3 to 4" on center.
4. Start at top plate, outside corner. Work down to bottom plate.
5. Unroll gradually, stapling horizontally, top first, then mid-rail, then bottom sill.
6. Stretch down and across as fabric is fastened to the frame.

Metal Cross Tie Notes:

1. The metal cross ties are to be 1" wide and 2mm thick Simpson metal ties or similar.
2. The installation locations are as indicated in the elevations.
3. Attach the metal cross to the wood frame structure with 8 - 600MPA 2.65mm diameter nails in order to develop full capacity.

EXECUTION TIME TO MODEL WOOD T-SHELTERS AT LEOGANE / ORIGINAL MODEL

This execution time have estimated base on real references of the Leogane teams, however, sometimes we are using average time

| PROCESS | ACTIVITY | UNIT | EXECUTION TIME | |
|--------------|---|--------------------|--|---|
| COMMUNITY | Families Selection Process | Family | 25 per day (urban zone) 18 per day (rural zone) | 2 people |
| | | | | |
| WAREHOUSE | Storage | T-shelter | According arrive | 2 people |
| | Delivery | T-shelter | According claim | 2 people |
| | Inventory | T-shelter | According necessities | 1 person |
| | Delivery to construction site (transport) | T-shelter | 10 T-shelters per day | 1 person & 1 pick up car |
| | Warehouse Storage Capacity | T-SHELTER | 50 T-shelters per week | 2 containers (40 ft) and 5 containers (20 ft) |
| | | | | |
| FACTORY | Wood Structures cut | T-shelter | 10 T-Shelters per day | 6 people |
| | Door and window cut & assembly | T-shelter | 15 T-Shelters per day | 4 people |
| | Foundation steel elements (cut and holding) | T-shelter | 22 T-Shelters per day | 2 people |
| | Foundation concrete elements | T-shelter | 17 T-shelters per day | 6 people |
| | Factory Total Production | T – SHELTER | Minimum 12 per day | Size factory 1200 ft², and 18 people |
| | | | | |
| CONSTRUCTION | | | | |
| | Site layout | T-shelter | 20 minutes | 2 persons & family support |
| | | | | |
| | Foundation & leveling | T-shelter | 30 minutes | 3 persons & family support |
| | Frame elevation | T-shelter | 3 hours | 1 Crew leader + 3 persons & family support |
| | Roof putting | T-shelter | 2 hours | 1 Crew leader + 3 persons & family support |
| | Tarp putting | T-shelter | 2 hours, 30 minutes | 1 Crew leader + 3 persons & family support |
| | Door and windows | T-shelter | 1 hour | 1 Crew leader + 3 persons & family support |
| | Screen / tarp | T-shelter | 1 hour | 1 Crew leader + 3 persons & family support |
| | Hurricane or strong tie | T-shelter | 45 minutes | 1 Crew leader + 3 persons & family support |
| | Details finish | T-shelter | 1 hour | 1 Crew leader + 3 persons & family support |
| | Total PRODUCTION | T-shelters | 11h45m (1.5 days) per T-Shelter | 1 Crew leader + 3 persons & family support (5 crews) |

EXECUTION TIME - MODEL WOOD T-SHELTERS AT LEOGANE – PRODUCTION PER WEEK¹

| PROCESSES | CURRENT EXECUTION TIME | | | | IN ORDER TO REACH 100 PER WEEK |
|--------------|--------------------------|------------|--------------|-----------------------------|---------------------------------------|
| | ACTIVITY | UNIT | RATE | PEOPLE | |
| COMMUNITY | Families selection | families | 100 per week | 2 people | 2 people |
| FACTORY | Prefabricated elements | T-shelter | 50 per week | 4 teams (18 people) | 36 people & double tools & equipment |
| TRANSPORT | Transport factory – Site | Truck | 50 per week | 1 driver | 2 drivers and 2 pickup or 1 big truck |
| CONSTRUCTION | Building the T-shelter | T -shelter | 4 per week | 1 team (1 crew + 3 peoples) | 25 teams (working 6 days per week) |

- a. In order to reach the 100 t-shelters per week, also, the HRC local structure should include the administrative assistant and other support and operation staff (janitor, drivers, security, etc.)
- b. The estimated is taking into consideration that the procurement and delivery of resources run without problems, on time, and that the planning and organizational operational planning and organizational is doing adequately

¹ This one is not taking into consideration the latrines' construction yet
