Responses to open ended questions (Partners)

Write here any comments or information you wish to add on how the Cluster supports service delivery.

The Cluster should take appropriate retributive actions, as applicable by the Head of the Cluster, against the organizations that refuse to share their information with others, or those who don't coordinate prior to the beginning of any activity, in order to avoid the duplicate of received assistance to the same beneficiaries.

The tasks should be divided between the actors working in the same field as per the assigned areas to implement the activity.

The Cluster support the excellent service providers partners in terms of information, selection criteria of beneficiaries and areas.

Please write here any comments or information you wish to add on how the Cluster informs decisions of the HC/HCT.

there is still a clear gap between the Cluster and Humanitarian Affairs Officer, or the resources are distributed unequally by the Humanitarian Affairs Officer.

Write here any comments or information you wish to add about planning and strategy development.

Usually, the plans and strategies for the Humanitarian Response are set based on the needs survey. In the end, much to our surprise, great portion of the funding goes to other areas without any convincing clarification or justification.

Write here any comments or information you wish to add on how the Cluster has monitored and reported its strategy and results.

Monitoring groups from the members of the Cluster should be formed to monitor the implementation of any Cluster partner, and to assess and rectify any mistakes, and to facilitate obstacles that might arise during the implementation of activities included in the planned strategy of the Cluster framework.

Please write here any other comments or information you wish to add on preparedness and contingency planning.

Contingency plans must be updated, discussed, and developed regularly based on the recent update to achieve the best result confronting any possible emergencies.

Write here any comments or information you wish to add on Cluster accountability to affected women, girls, men and boys, and how feedback systems are performing.

A new mechanism should be set to engage the affected populations of different ages and gender to come up with solutions, and how to implement them, and the expected results and how to monitor them to reach the best results of the funds assigned to assist the affected populations.
