

Shelter & CCCM Needs Analysis and Response Strategy DRAFT

Cluster Meeting – February 2012

Projection: the Gap – January 2012

Projection of camp-based population for 2012

Natural decrease of camp population by end 2012

Households in planned sites (low priority)

Estimated impact of committed solutions

GAP

The ways forward

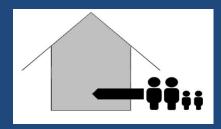

Recommendations

74,405 additional return solutions required

Targeting people in camps

= 24,000 additional permanent housing solutions

= 30,000 additional Rental subsidy solutions

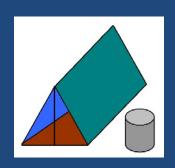

= 20,000 additional Transitional shelters

Cluster activities in 2012

If large populations remain in camps due to a lack of return solutions, the following actions will be urgently required:

Organize contingency stocks to prepare camps for hurricane season 2012

Organize emergency shelter replacement and repair in camps

Advocacy:

2. Under 2,300 return solutions would close camps in Léogane & Gressier

3. 50% of beneficiaries of Return solution programs should be camp-based population

4. More yellow house repair and permanent house reconstruction should be targeting people in camps
