Some 2.8 million IDPs are living in North-West Syria, bringing the total population close to 4.6 million.

According to HNAP, 9,852 individuals were displaced in May, which is the highest rate recorded since December 2021. Almost all of the persons displaced in May have been displaced two times or more (99 percent). The primary driving force for displacement was the deterioration of the economic and security situation, followed by access to basic services in the location of arrival.

Out of the people displaced in May, 63 percent arrived to IDP sites, primarily in Al-Bab, Maaret Tamsrin and Dana sub-districts. The other 47 percent of May IDPs arrived in communities, mainly located in Dana, Jandairis and Idleb sub-districts.

S/NFI Cluster members continue to actively respond to the needs of the newly displaced persons, as well as protracted IDPs in North-West Syria.

In May 2022, close to 95,000 individuals received NFI assistance, in the form of NFI kits, kitchen sets. Shelter needs of almost 113,000 people were responded to in May, including the provision of emergency shelter, installation of transitional shelters, infrastructure improvements in IDP sites and rehabilitation of damaged or unfinished shelters.

Of those reached with shelter and NFI assistance in May, approximately 51 percent were female and 49 percent were male. Out of the households reached, 16 percent were female-headed.

In May 2022, in total 484,000 people have been reached with shelter assistance.

In total in 2022, some 1.17 million people have been reached with NFI assistance (including both core and seasonal NFIs).
Winterization Planning and Guidelines

As posters.

As posters.

The SNFI Cluster has developed an awareness raising brochure focusing mainly on the safe usage of fuel and stoves during winter, targeting individuals and households. In consideration of COVID-19 mitigation measures related to avoiding distributing paper brochures, it is possible to use this brochure as a sticker on NFI kits, or

The Cluster Coordination Team shared the updated Guidance Note on Winterization for NWS with Cluster members, donors and other stakeholders. This document combines recommendations, based on experience, inputs from donors, SAG and Cluster members as well as members of
