

KEY MESSAGE

Winterization provides **life-saving assistance** to the most vulnerable individuals, preventing mortalities from cold related sicknesses especially for children and the elderly.

A timely winterization response will **mitigate protection risks** (especially for the elderly, women and children) and reduce negative coping mechanisms.

The joint winterization strategy calls for **an integrated response** with Food, WASH, Health and Protection clusters and advocates for the use of **standardized assistance packages**.

Humanitarian community to contribute to research on **alternate sustainable winterization** solutions for protracted IDPs that address recurrent seasonal changes.

95,350

of projected household in need of winterization response
