

KEY MESSAGES

The lack of warm clothing, insulation, heating heightens the risk of respiratory infections, hypothermia and preventable mortality among children and the elderly. Household Air Pollution (HAP) is particularly acute during the winter with over 28 per cent of IDPs using waste (paper, plastic, carton board, etc.), as their primary source of energy for heating. Women and children are at particular risk of exposure as they stay at home more than men. Similarly, a staggering 61 per cent of IDPs report possession of less than one blanket per member and 55 percent displaced households report having no winter clothes for all children.

Winterization provides **life-saving support** to the most vulnerable individuals, protecting them from harsh weather conditions and preventing mortalities, especially for children and the elderly.

This strategy utilises an **integrated approach** and **enhanced coordination** between clusters to address cross-cutting needs brought on by the harsh winter season.

Early identification of funds will enable partners to plan ahead, procure and pre-position winter items. This is crucial in light of possible delays due to COVID-19.

A **timely response** will alleviate the adoption of negative coping mechanisms, lessen occurrence of respiratory infections, U-5 mortalities, hypothermia and in some cases even death especially among elderly, women and children.

AFFECTED POPULATION

4,855,748

people in need of winterisation response.

200,107

households to be reached with the winterisation response.

FUNDING STATUS*

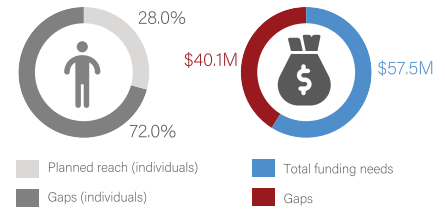

USD 40.1M

Funding required to assist targeted households in need of winterisation response.

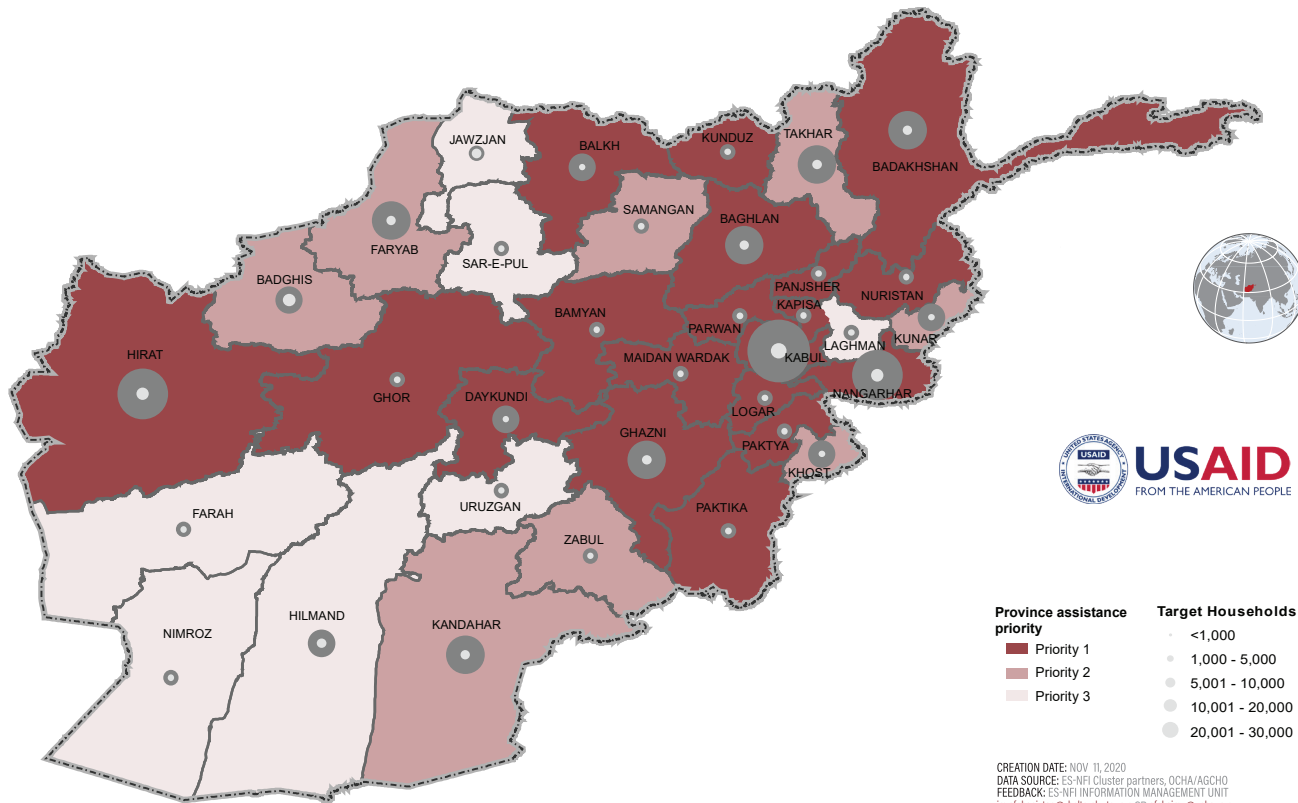

* The current funding status includes upcoming AHF allocations but does not include Government commitments as confirmation has not been received, although lobbying continues.

USD 17.4M funding available to assist targeted households in need of winteriation response.

RESPONSE ACTIVITIES

Priority activities	Target HHS in need	Capacity available
Rental Subsidy (CfR)	6,003	21% / 79%
Shelter repair	12,006	29% / 71%
Winter clothing kit	86,046	31% / 69%
Blankets	114,061	19% / 81%
Heating Fuel	172,092	30% / 70%

Province assistance priority
