## NEED ANALYSIS

Further, along with the shelter interventions in Non-Government Controlled Area (NGCA), needs for assistance are more and more obvious despite strong constraints as access, cargo limitations between GCA and NGCA and also authorization to operate in the area for cluster members. In parallel, central and western Ukraine are still under-covered by shelter/NFI stakeholders leading to a potentially serious gap for the next winter season. At last, 15 month of crisis exhausted IDPs resources leading to augment the risk of eviction for the most vulnerable (GCA).

## HIGHLIGHTS

- Shelter/NFI Strategy for Ukraine, Term of Reference of the Cluster, Strategic Advisory Group and Technical Working Groups have been endorsed during the plenary session ([see here](#)).
- Sub national northern Donbass coordination is up and running (GCA). First coordination meeting occurred in Donetsk for NGCA.
- Progress report of the Cluster showing achievements since 2014 has been released ([see here](#)).
- Shelter/NFI assessment in five Eastern regions of Ukraine has finished. Preliminary results were presented in the field (Sloviansk and Dnipropetrovsk) and in Kyiv. Final report is under preparation and will include all comments that were received during presentations. The final release is tentatively expected for the 25<sup>th</sup> of July.

## KEY DATES

Crimea events in March 2014 and increased tensions in the East in April 2014 resulting into a conflict have triggered massive displacement in and from Ukraine. In January 2015 Debaltseve crisis took place: massive shelling occurred in highly urban area of Debaltseve area leading to immediate influx of some 10,000 IDPs to both GCA and NGCA. Despite Minsk II ceasefire agreement, the security pressure is still not released and recovery not engaged.

Activation of Cluster: December 2014
