

# What do you think the priorities should be for the GSC in the coming year?

# How would you describe the overall event in a few words.

# Overall, how was the meeting?

# What did you like the most from this years meeting?

Networking events

Putting faces to names

The translation service!

shelter is koool

advanced planning and support

That we had a wide representation from the country teams

Diversity

Short, simple, on focus sessions, and wide variety of learning

Option to attend more discussions, less overlap than previous years.

# What did you like the most from this years meeting?

networking

Open space sessions

impressed by the use of technology :D

networking was surprisingly effective

Not having overlapping sessions

Presentations from the field

Coffee break

I could come (don't have a travel budget)!

Honest discussions

# What did you like the most from this years meeting?

counrty updates

Networking

inspiring talks on topics we less know of

The spread of the meetings allowing attendees to plan which meetings to attend

open space sessions (freedom and flexibility)

Networking session, using friendly virtual webinar dashboard

Open space sessions were great

It was inclusive. Each participant was able to share ideas.

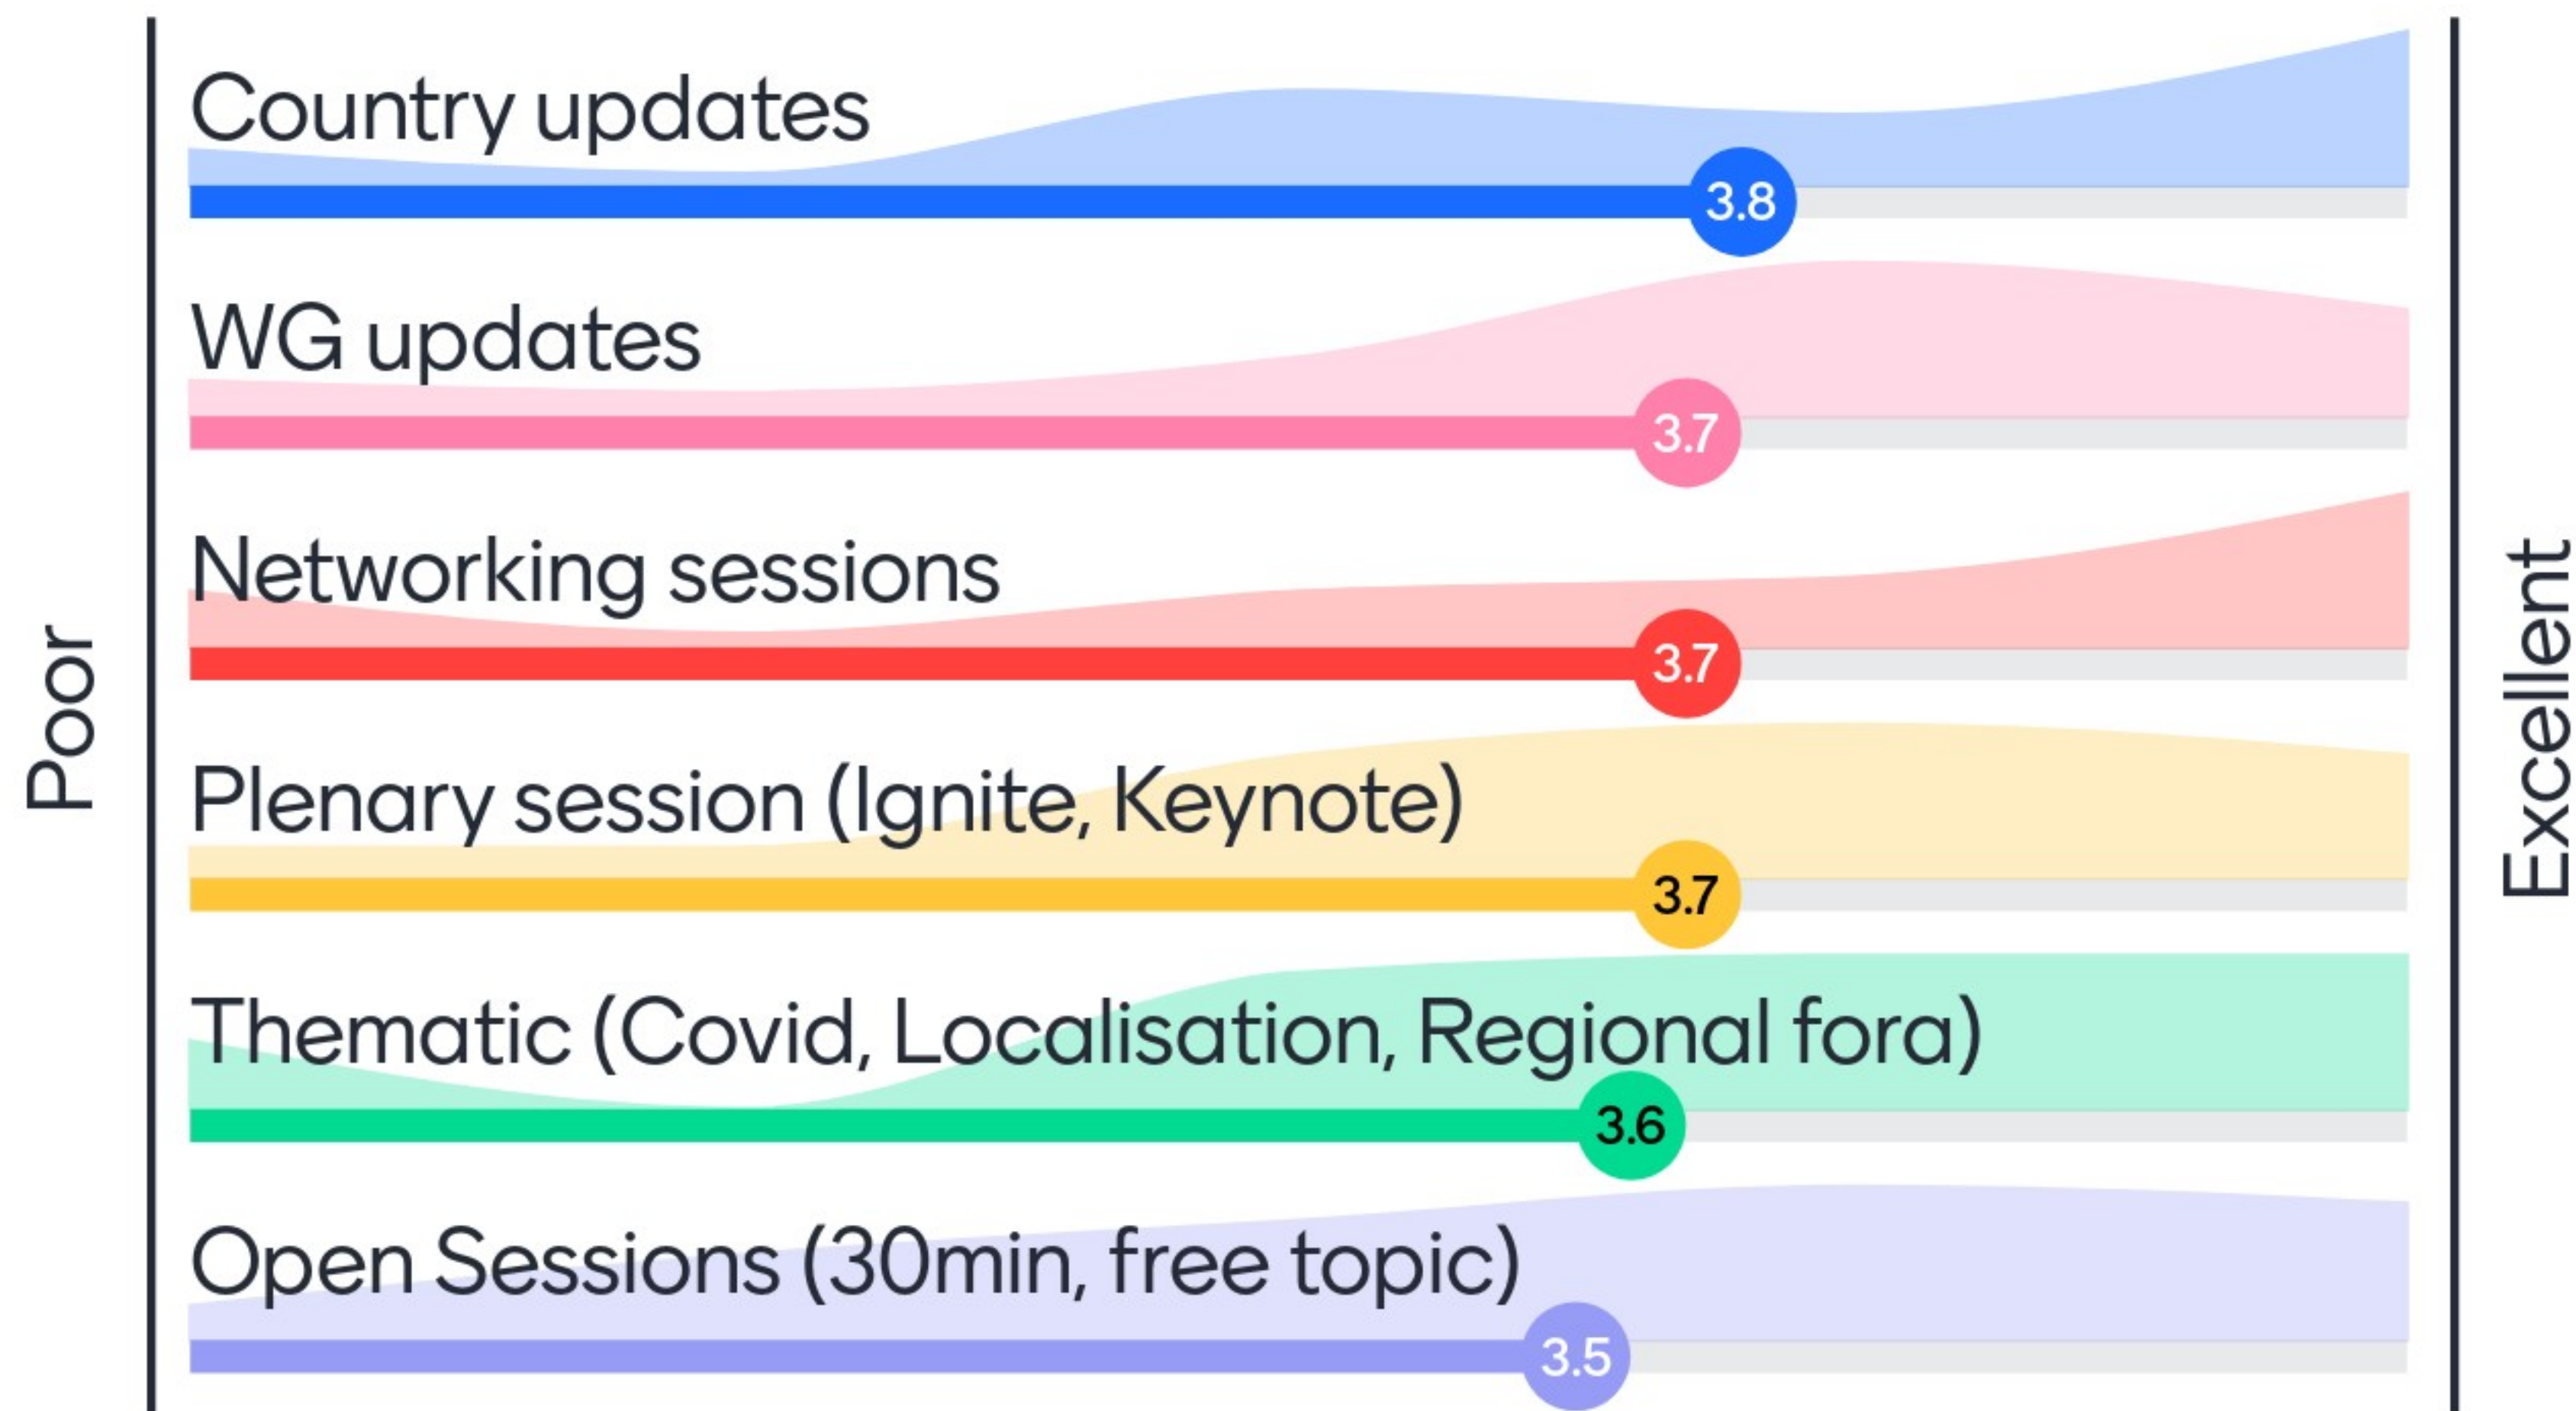

(1) Our collective institution (GSC) is 15 years old, and turn more and more to an adult shape/way of thinking. (2) These meetings adapt well to the constrains of our constrained era, allowing more participants and greening it

# What did you like the most from this years meeting?

Open spaces were good but would have been better if longer, with more time for in-depth discussion.

networking

# Which type of session worked well online.

# What would you like to change for next year? eg. Did it enable you to make new connections?

More time for open sessions.

Go back to face to face with online component

have it face to face

In person would be better!

I missed the ability to follow up and discuss afterwards- ie meetings at the bar, dinners- great to see everyone online, but the connections were made in years passed. I didn't get to meet anyone new really this year.

More guidance about the sessions ahead of time

No

More info published in advance of sessions to allow all to prep

Give Opens Sessions option to be longer... 30 mins worked well for some but others would have been great to have full hour for more discussion

# What would you like to change for next year? eg. Did it enable you to make new connections?

combination of in person and electronic

Take the sessions that worked well and do those along the year

face to face

Have a good balance of HO / Global colleagues and colleagues working on the field.

Mixing remote and face to face meeting

part online part face to face (but not physical and online sessions together)

more time on an open session especially with a hot theme

Explore more the informal part of it, the networking. We can have a face to face AND a virtual one.

The food

# What would you like to change for next year? eg. Did it enable you to make new connections?

Combine online prep with face to face meetings

more on technical issues,

Online meeting few time a year but keep face to face once a year.

spread out shelter topics over year and use in person meeting to be more focused on results and changes

Can't contribute to the loss of human interaction

Reduce the one month meeting; keep face-to face meeting with online connection

Take stock of how these sort of global zoom meetings work best and take the best points for next year.

Have both in-person and online. Online spread throughout the year.

Monthly or weekly podcast on different topics and different countries.

# What would you like to change for next year? eg. Did it enable you to make new connections?

It went really well. The networking was much more difficult, but I am not sure you could have made it any better.

Explore the new way to do fondue

More learning modules on Technical aspects.

missed the opportunity to talk with people over coffee

Can allow participants to continue discussion if they wish

There is a cool ap called wonderme which allows social interactions naturally. For drinks after! Check it out.

We can have 15 minute windows after each session for people to continue talking

Have all sessions available online soon after to be able to watch it if you missed parts or feel like you wish to hear parts again

Provide the platform and ability to continue conversations post the session within the same timeframe whilst it is fresh in our minds

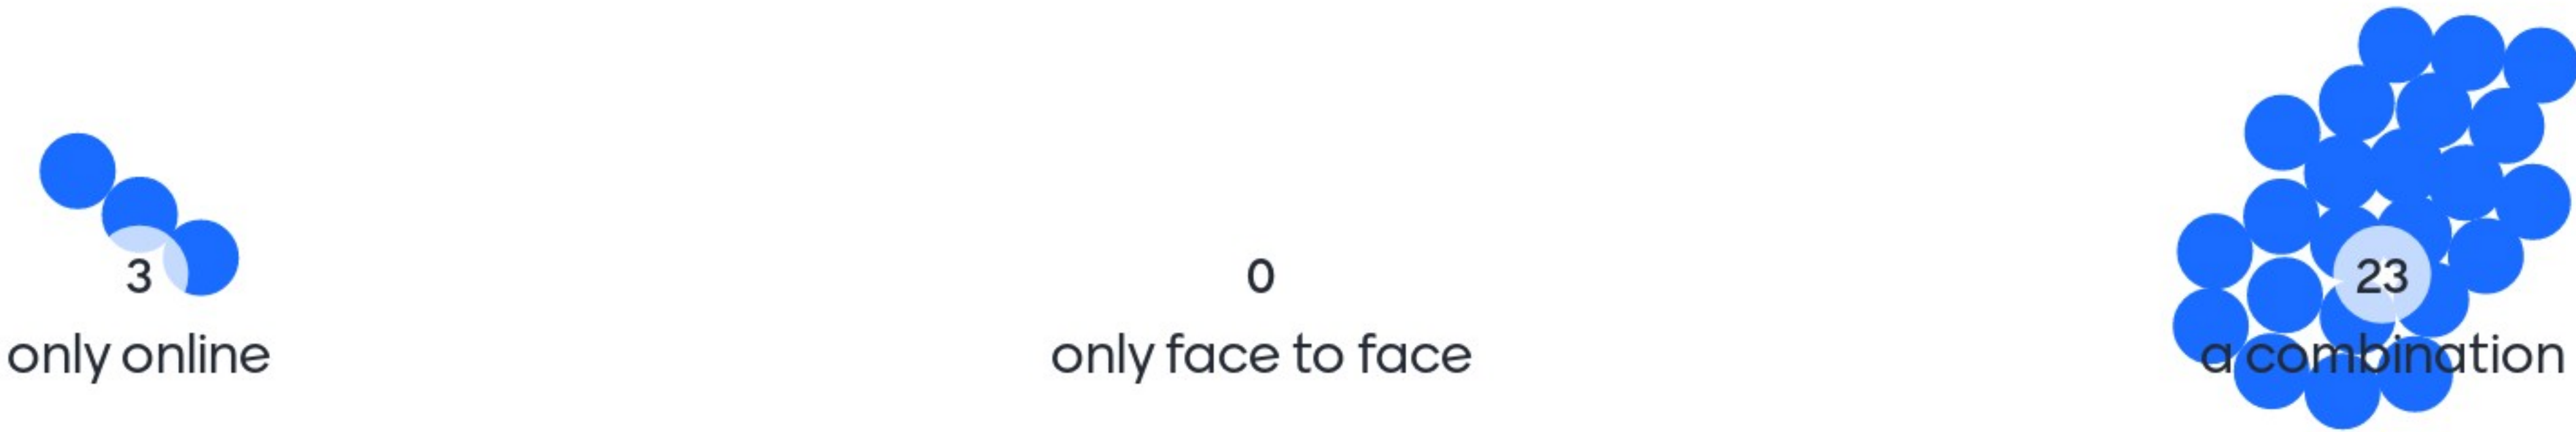

# What would you like to change for next year? eg. Did it enable you to make new connections?

more break-out smaller sessions for more networking opportunities

No new connections virtually... didn't go into same depth, but it was interesting and some things were advanced, but need incentive to keep work and conversation going.

face to face meeting if possible at all

# What would be your preferred mechanism next year?

# Any other comments, advice or wishes....

Good work all! keep it up!

Great work, keep it up!

have a prize for the best (shelter-related) background

I would be interested to see the compilation of all recommendations coming from all the side sessions. Did we keep the theme as in years past thereby getting more quality out of themes? Or are we able to touch on a wider number of topics?

Thank you very much. Well done!

Thank you

Overall a really positive event under the circumstances.

Very informative, thank you! Making the most out of our new virtual reality. Would have been great if all sessions were recorded.

Keep moving. Good job!

# Any other comments, advice or wishes....

How do we better capture the learnings from the country-level sessions into better global policy?

Thanks for all the great and hard work putting all of this together !

Excellent work

Prize good presenters/moderators

We did it altogether, thank you!

well managed, well done

Gsc is a cluster pioneer well done.

thanks for all the hard work setting up the meetings, especially thanks shirin!

Review the content of sessions to get a fair balance between policy content and field practice

# Any other comments, advice or wishes....

congratulations on a job well done, great pilot programme :)
