Babar Mahal, Kathmandu, NEPAL Reprinted: 2064

## **Preface**

This Nepal Standard was prepared during 1993 as part of a project to prepare a draft National Building Code for Nepal.

In 1988 the Ministry of Housing and Physical Planning (MHPP), conscious of the growing needs of Nepal's urban and shelter sectors, requested technical assistance from the United Nations Development Programme and their executing agency, United Nations Centre for Human Settlements (UNCHS).

A programme of Policy and Technical Support was set up within the Ministry (UNDP Project NEP/88/054) and a number of activities have been undertaken within this framework.

The 1988 earthquake in Nepal, and the resulting deaths and damage to both housing and schools, again drew attention to the need for changes and improvement in current building construction and design methods.

Until now, Nepal has not had any regulations or documents of its own setting out either requirements or good practice for achieving satisfactory strength in buildings.

In late 1991 the MHPP and UNCHS requested proposals for the development of such regulations and documents from international organisations in response to terms of reference prepared by a panel of experts.

This document has been prepared by the subcontractor's team working within the Department of Building, the team including members of the Department and the MHPP. As part of the proposed management and implementation strategy, it has been prepared so as to conform with the general presentation requirements of the Nepal Bureau of Standards and Metrology.

The subproject has been undertaken under the aegis of an Advisory Panel to the MHPP.

The Advisory Panel consisted of:

Mr. UB Malla, Joint Secretary, MHPP	Chairman
Director General, Department of Building	
(Mr. LR Upadhyay)	Member
Mr. AR Pant, Under Secretary, MHPP	Member
Director General, Department of Mines & Geology	
(Mr. PL Shrestha)	Member
Director General, Nepal Bureau of Standards & Metrology	
(Mr. PB Manandhar)	Member
Dean, Institute of Engineering, Tribhuvan University	
(Dr. SB Mathe)	Member
Project Chief, Earthquake Areas Rehabilitation &	
Reconstruction Project	Member
President, Nepal Engineers Association	Member
Law Officer, MHPP (Mr. RB Dange)	Member
Representative, Society of Consulting Architectural &	
Engineering Firms (SCAEF)	Member

Representative, Society of Nepalese Architects (SONA)
Deputy Director General, Department of Building,
(Mr. JP Pradhan)

Member

Member-Secretary

The Subcontractor was BECA WORLEY INTERNATIONAL CONSULTANTS LTD. of New Zealand in conjunction with subconsultants who included :

Golder Associates Ltd., Canada SILT Consultants P. Ltd., Nepal TAEC Consult (P.) Ltd., Nepal Urban Regional Research, USA

#### Principal inputs to this standard came from:

Mr. YK Parajuli, TAEC

Mr. D Bhattarai, Assoc. Prof. of Construction Management, IoE.

Mr. AM Tuladhar, DoB, HMGN

Mr. JK Bothara, TAEC

Dr. RD Sharpe, BECA (Team Leader)

Revisions and Updated to this code came from:

Mr. Purna P.Kadariya, DG, DUDBC

Mr. Kishore Thapa, DDG, DUDBC

Mr. Mani Ratna Tuladhar, Sr. Div. Engineer, DUDBC

Mr. Jyoti Prasad Pradhan, Ex. DG, DOB

Mr. Bhubaneswor Lal Shrestha, Ex. DDG, DOB

Mr. Uttam Shrestha, Architect, Architects' Module Pvt.Ltd.

Mr. Manohar Lal Rajbhandhari, Sr. Structural Engineer, MR Associates

Mr. Amrit Man Tuladhar, Civil Engineer, DUDBC

5	Recycled/ Used Materials	
6	Storage of the Materials	
7	Transportation of Materials	
8	Methods of Test	
9		2

## 0. Foreword

This Standard deals with the requisite quality and effectiveness of construction materials used mainly in the building construction. It also deals with the storage of materials where storage has relevance to strength.

O.1 Since the quality requirements and test methods used to determine the quality are enumerated in the relevant materials standards, this standards provide a list of Nepal Standards (NS) for key materials used in the building construction. A list of related Indian Standards (IS) has been included for those materials for which Nepal Standards (NS) do not exist as yet. When NS or IS prepare Standards for other materials having a bearing on the strength characteristics of the buildings, or revised version of the existing Standard, these shall be deemed to be the requirement of this Standard. If it exists, the requirements of NS will govern and be mandatory unless the designer has based his design on a standard other than NS. The use of appropriate, adopted or new materials is encouraged, provided these materials have been proven to meet their intended purposes.

## 1 Scope

The minimum requirements of building materials for buildings complying with the National Building Code are set forth in this part of Standard. Criteria for accepting the use of appropriate and adopted new materials are also outlined.

## 2 Interpretation

## 2.1 General

In this Standard the word "shall" indicates a requirement that is to be adopted in order to comply with the Standard, while the word "should" indicates recommended practice.

Commentary clauses are prefaced by the letter C and the number of the appropriate clause subject to comment.

## 3 Materials

The use of materials confirming to NS or IS or any other approved standards agency shall deem to have satisfied the requirements of this Standard. A list of such Nepal Standards and Indian Standards appear in section 9 below.

# 4 Appropriate, Adopted or New Materials

Any appropriate, adopted or new materials that are not covered by the provision of this Standard may also be used in buildings requiring National Building code compliance, provided that these materials are equivalent, or better in quality, strength, effectiveness, fire resistance, durability, safety, maintenance and compatibility. Prior to the use of such materials, it shall be the responsibility of the building owner, or the authorised representative of the building owner, to obtain proof of equivalency.

# 5 Recycled / Used Materials

If recycled / used materials meet the requirements of the Standard, they may also be used.

# **6** Storage of the Materials

All building materials shall be stored in such a manner that no deterioration or loss or impairment of their structural and other inherent properties takes place.

NBC105V2.RV5

# 7 Transportation of Materials

All building materials shall be transported so as not to impair their inherent properties.

## 8 Methods of Test

The testing of materials necessary to fulfill the requirements of this Standard shall be carried out in accordance with the procedures laid down by NS. Where a NS procedure is not available, the testing shall conform to the procedures stipulated by IS or any other authority of similar stature. The test are to be carried out by appropriately-competent persons in a suitable laboratory. The list of Nepal Standards and Indian Standards for materials, which appear in the following section, also stipulate the procedures for testing.

## 9 List of Standards

Table 9.1 lists those Standards which are mandatory as minimum requirements for buildings designed to comply with other Nepal Standards for Engineered design.

The latest version of a Standard shall be used.

NBC105V2.RV5
