

# EMERGENCY SHELTER KIT

Emergency shelter kit contents were harmonized by the sector in June 2016.

- The kit is designed for distribution to relieve immediate, life-saving shelter need for **new or secondary displacement, or people on the move** – to tide people over until a better solution can be found.
- **Light and mobile** kit that can be easily transported and delivered quickly, at scale, as well as relatively easily carried by people to their next destinations if they are on the move.
- The kit includes 2 tarpaulins, 6 poles for basic framing and an assortment of fixings and tools
- The kit has an intended life-span of **3 – 6 months**.
- The kit costs **USD 65**.

No.	Description	Unit	Quantity	Estimated Cost (NGN)		Estimated Cost (USD)
