

TRANSITIONAL SHELTER KIT

The transitional shelter kit is still under consideration as a solution for

- **Rebuilding homes that have sustained major damage,** or
- **Extending available shelter in host community settings.**
- It should provide **sufficient materials for a substantial beginning**, which can be built upon, including also a small **cash grant** to allow some flexibility for people to supplement according to their specific requirements.
- The transitional shelter kit should be accompanied with **strong community engagement**, including technical support where required and monitoring to ensure adequate and safe shelter.
- Close collaboration with the Protection Sector should ensure **Housing, Land and Property support**.
- The kit has a cost band of **USD 400 – 600**.
