## Nepal Earthquake Response **Kathmandu District - Factsheet**

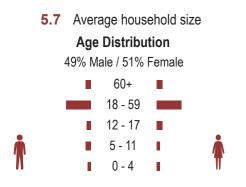

SHELTER RECOVERY ASSESSMENT, 16-19 MAY 2015 [Population: 1,744,240\* Households: 436,344\*]

## **Summarv**

On 25 April 2015, a 7.8 magnitude earthquake struck Nepal with its epicenter in Lamjung District, approximately 81 km northwest of the country capital, Kathmandu. Another earthquake of magnitude 7.3 followed on 12 May 2015 in Dolakha District. REACH, through its partnership with the Global Shelter Cluster, was deployed to Nepal to facilitate the development of a comprehensive shelter and settlements recovery strategy for the Nepal Shelter Cluster, and establish a baseline for analysis of the recovery process. The data presented in this factsheet is the result of a stratified, random survey of 168 households, including those with damaged and non-damaged shelters. Findings can be generalised at district level with a 95% level of confidence and a 10% margin of error.

## **Demographics**

## Displacement

- **75%** of households reported that they are not living in the same shelter as before the earthquakes
- Median travel time from current shelter to original 2 min house
- 9% of households are 10 minutes or more from their original house

Households that are 10 minutes or more from their original house are predominantly with family in a different community.

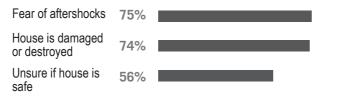

## Where displaced households are staying

Land of damaged house	60%	
Open ground	15%	
With family in same community	13%	
With family in different community	5%	
Other	3%	1
Evacuation Centre	4%	

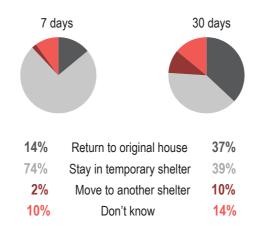

- Female-headed households 20%
- 0% Households with only one member over the age of 18
- 17% Households who are renting
- Households with physically disabled 9%
- 4% Households hosting separated, orphaned

## **Reported reasons for displacement**

(Respondents could report multiple reasons)

## Intentions of displaced households

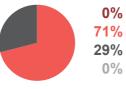

## **Housing Damage**

84% of households reported housing damage as a result of the earthquakes

### Reported damage by housing typology

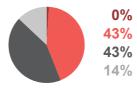

Walls mud-bonded brick/stone Roof slate / tile Housing type prevalence 4%

0% Completely destroyed

- Heavy damage / partial collapse
- Minor-moderate damage
- 0% No damage

Walls cement-bonded brick/stone Roof CGI Housing type prevalence 4%

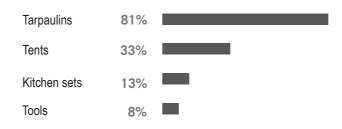

Completely destroyed Heavy damage / partial collapse Minor-moderate damage No damage

## **Temporary Shelter**

Of households that sustained housing damage:

- 52% reported that they have constructed or are constructing temporary shelters
- 31% of all households surveyed reported that they have received material shelter assistance
- 0% reported that they have received cash assistance

#### Top types of material shelter assistance received (Respondents could report multiple types)

For more information on this factsheet please contact: Shelter Cluster: coord1.nepal@sheltercluster.org REACH Initiative: geneva@reach-initiative.org

of households reported that that they feel 60% unsafe in the shelter they are currently living in

Walls mud-bonded brick/stone corrugated galvanised iron (CGI) Roof Housing type prevalence 25%

14% Completely destroyed 57% Heavy damage / partial collapse 29% Minor-moderate damage 0% No damage

Walls reinforced concrete cement (RCC) Roof RCC Housing type prevalence 47%

#### **Reported emergency shelter needs**

	1st need	2nd need	3rd need
Durable construction materials	66%	65%	54%
Shelter materials	20%	26%	21%
Blankets/mats	0%	0%	0%
Tools	1%	1%	5%
Labour	0%	1%	7%
Technical assistance	10%	6%	9%
Other	4%	1%	5%

SHELTER RECOVERY ASSESSMENT, 16-19 MAY 2015

[Population: 1,744,240\* Households: 436,344\*] \*Based on 2011 Nenal cer

## **Housing Recovery**

Of households reporting housing damage:

- of households reported that they have started 9% repairing or rebuilding their original house
- of these 12 households reported that they have 8% received support to repair or rebuild
- 72% of households that sustained housing damage reported that they need support to remove debris

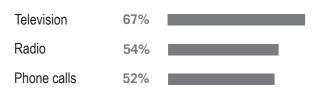

#### Female-headed household recovery

(Due to the small sample size, it should be noted that the information below is not statistically significant)

- of female-headed households reported that they 3% are repairing or rebuilding their original house
- 0% of these 1 households reported that they have received support to repair or rebuild
- 70% of households that sustatined housing damage reported that they need support to remove debris

## Communication

46% of households reported knowing of someone in the community who was consulted before aid delivery

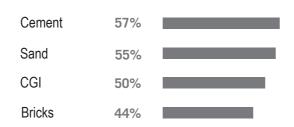

## **Public Services**

#### Reported inability to access to services and primary reason

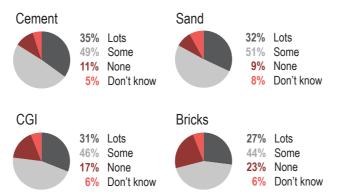

Of all assessed households:

- **13%** Health services Facility destroyed in earthquake
- **26%** Municipal services Lack of documentation

#### Top 4 reported repair / rebuild needs (Respondents could report multiple needs)

#### Access to needed repair / rebuild materials

## **Hazard Protection**

Of all assessed households:

41% Education

Facility destroyed in earthquake

- 59% of households feel only partially protected or completely unprotected against current weather condititons
- of households do not feel protected against 61% upcoming monsoon season
- 62% of households do not feel protected against upcoming winter conditions
- 24% of households have experienced damage from past natural hazard(s)

## **Reported Household Needs**

#### **Priority NFI needs**

(Respondents' reported top three needs)

	1st need	2nd need	3rd need
Blankets/mats	53%	22%	5%
Hygiene items	11%	10%	10%
Torches	10%	14%	18%
Gas/fuel	9%	14%	11%
Kitchen items	9%	19%	3%

## WASH

- of households reported that their pre-earthquake 15% source of drinking water was damaged
- of households reported that their sanitation system 13% was completely destroyed or heavily damaged

#### Source of drinking water

Private pipe

Municipal tap 26%

36%

31%

Before 25 April

# After 12 May

6% 6% Spout 27% Other 38%

30%

- of households reported a decline in water quality 26%
- of households reported a decrease in water quantity 23%

Flush (septic)

Pit Latrine

None / Other

#### Type of toilet facility

Before 25 April

## After 12 May

Average # of households per toilet 2.7 4.3

## Priority household needs

(Respondents' reported top three needs)

	1st need	2nd need	3rd need
Shelter/housing	60%	9%	6%
Drinking water	8%	11%	2%
Wastewater disposal system	6%	2%	1%
Food	6%	15%	5%
Building tools	6%	16%	8%

## Livelihoods

## Top 5 reported livelihoods prior to earthquakes

(Respondents could report multiple livelihoods)

Informal job	36%	
Formal job	32%	
Subsistence farming	29%	
Own a business	26%	
Income from rent	19%	

- 73% of households reported a decrease in income immediately after the earthquakes
- of households reporting a decrease in income 1% said that their income has since been fully restored
- 38% of households reporting a decrease in income said that their income has since been partially restored

## Livestock ownership

30% of households kept livestock prior to the earthquakes

On average, **5%** of these households' livestock died or were lost as a result of the earthquakes
