# MTIT Overall Shelter vulnerability

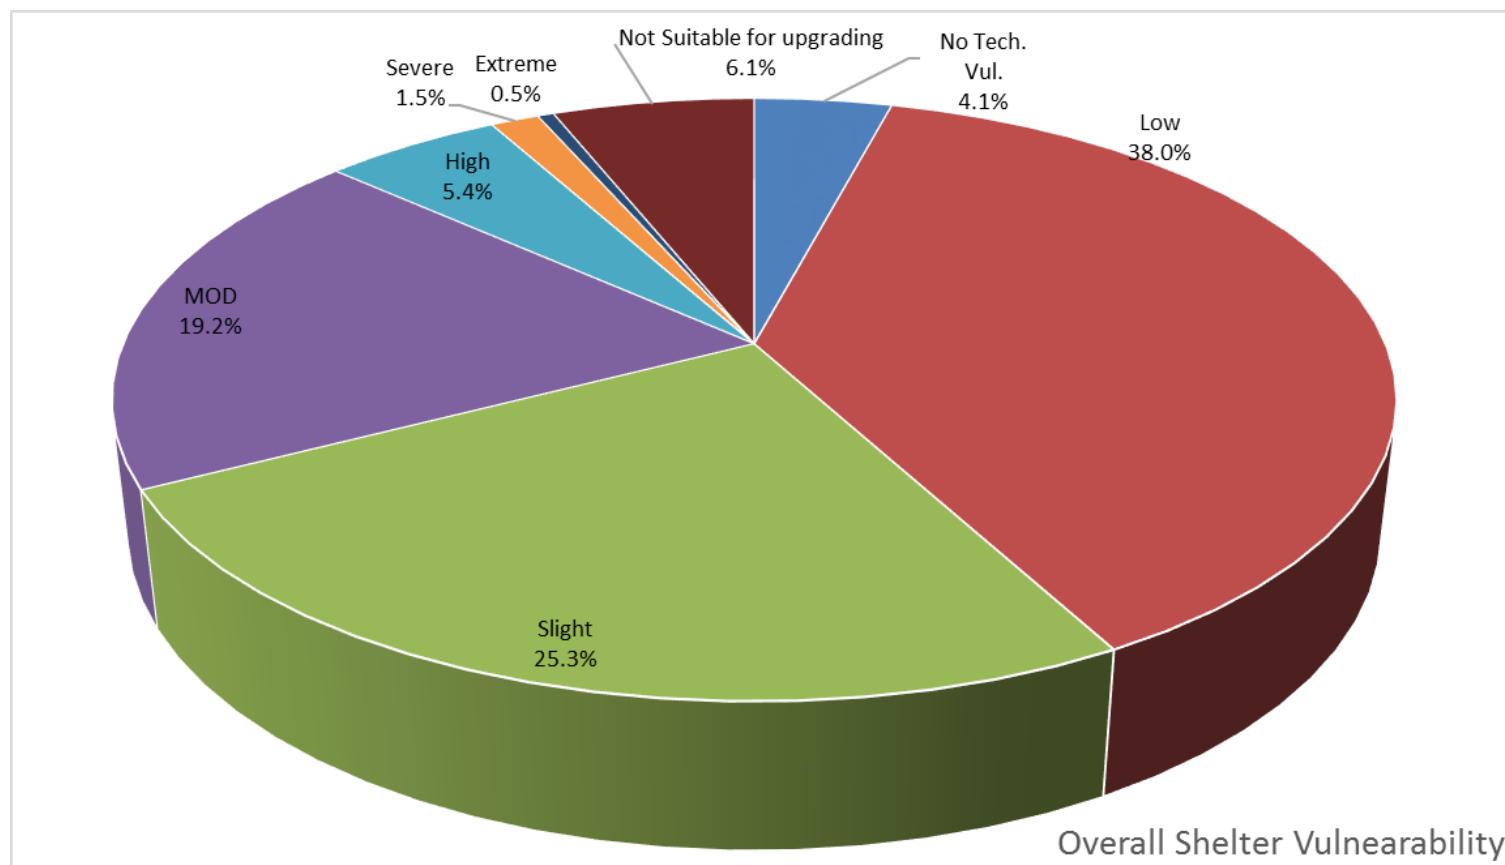

# MTIT Overall Shelter vulnerability

# MOSD Overall shelter vulnerability

# MOSD Overall shelter vulnerability

- More than 92% of the Gaza strip housing units possessed some kind of shelter vulnerability, including 6.2% which are unsuitable for upgrading since it require reconstruction or relocation.
- 10.5% of the housing stock in Gaza (33,000) still needs shelter upgrade to the minimum standards with a prioritized 24,000 households in urgent need to receive shelter assistance
- The prevalence of housing units with substandard conditions is clearer at the families registered on the MOSD social protection program who were found at 40% higher than the general sample and having more social and technical vulnerabilities as well as combined shelter vulnerabilities. 96% of the list possessed some kind of shelter vulnerability with 27% of the families in need to be prioritized for shelter assistance.
