

Shelter/NFI Situation

The Humanitarian Needs Assessment Program (HNAP) conducted an assessment for the Shelter and Non-Food Items (SNFI) Cluster to assess the shelter adequacy and living conditions in northwest Syria. It was published in the first week of September. At the time of the assessment, 18% of the population in northwest Syria were living in either managed, informal or transit camps, 6% in unfinished apartments or houses, 5% in damaged houses/apartments, and 1% in collective centres.

Overall, the numbers of households living in damaged apartments/houses are highest in Dana, Saraqab, Daret Azza, and Haritan sub-districts of Idleb and Aleppo governorates. The situation in Dana is particularly alarming as 68,344 HHs were living in managed camps at the time of the assessment (49% of the Sub-D population). The number of households living in camp in this sub-district continued to increase in July and August 2019.

Response

In August, the SNFI Cluster reached more than 120,000 individuals with shelter and NFI assistance in Aleppo and Idleb Governorates.

The SNFI Cluster have planned to rehabilitate housing units (apartments, houses) for around 15,158 people in September. Some 530,000 people would need support to repair or rehabilitate the shelters they are living in, including 300,000 individuals living in damaged or unfinished buildings. Cluster members could scale up the response and target 32,000 additional people. Cluster members need \$7M additional funding to do so.

Main Cluster Activities

- Recruitment and selection of one Information Management Officer and one Data management Officer for the SNFI cluster coordination team (to be deployed in September).
- Support to SCHF to prepare and review the reserve allocation for winterization and shelter rehabilitations
- Revision of the Winterization Guidance Note that include Cash/Voucher modality.
- Analysis of the shelter assessment data and production of maps with HNAP.
- Analysis of new shelter solutions in collaboration with the Global Shelter Cluster and the Strategic Advisory Group
- Shelter/HLP workshop to support our members implementing shelter project in camps and outside of camps (29 Aug.).

Winterization: Targets, Funding, Gaps

Following the Winterisation After Action Review, the SNFI Cluster has prepared a plan in coordination with the members. The cluster members are planning to reach 1,140,000 ind in need of winter assistance. The cluster members managed to secure funding (\$18.6M) to reach around 600,000 people in need. 19 cluster members are requesting \$16.6 in order to reach 540,000 additional people
