

Newly arrived IDPs await shelter registration in Bentiu PoC. Concern Worldwide/Feb 16

NEEDS ANALYSIS

- IDPs in Protection of Civilians (PoC) areas of UN peacekeeping bases urgently require shelter reinforcements ahead of the rainy season. Rains have commenced in a few areas of the country as of April.
- Some populations returning to areas they were displaced from and others settling in to new areas require basic shelter support to prepare for the rainy season.
- New and significant caseloads of conflict IDPs have been generated in areas previously considered to be stable and more focused on development programs, such as Western Bahr el Ghazal, Western Equatoria and parts of Jonglei.
- Deepening and severe food insecurity has eroded the coping mechanisms of millions of people who are increasingly unable to access basic shelter and household items as their household resources narrow.

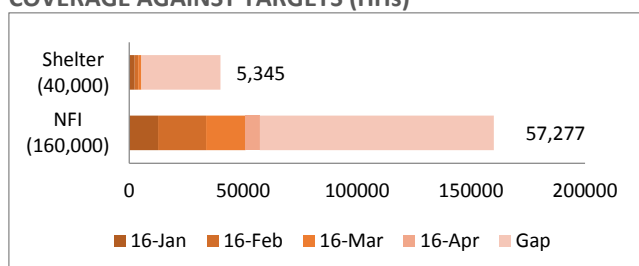

RESPONSE

- This year, Cluster partners have served nearly 60,000 families with NFI and over 5,000 households with shelter support.
- In PoC sites specifically, Partners are working around the clock to ensure that over 200,000 IDP residents are living in reinforced shelters for the heavy rainy season.
- In the hardest to reach areas where insecurity prevents humanitarian access, such as Western Equatoria, the Cluster is providing multi-sectoral 'survival kits' that contain key life-saving items from Nutrition, WASH, FSL and NFI Clusters.

GAPS / CHALLENGES

- Partner agencies across South Sudan are experiencing severe delays or complete absences of funding for their crucial life-saving programmes in the Cluster's 2016 Response Plan. Many agencies have had to limit activities, downsize staff and programmes and in some cases put projects on hold. The Cluster calculates this could affect over 200,000 beneficiaries if immediate support is not provided.
- South Sudan's high needs and difficult operating environment continue to limit the assistance provided in field locations, where access and security create delays.

KEY DATES

The Shelter NFI Cluster was activated in 2011 upon South Sudan's independence from Sudan. Since the current civil war began in December 2013, the Cluster has scaled up drastically to meet needs that have continued to rise and deepen.

Activation of cluster: 2011
